Use:

These cartridges are provided for saluting and simulated firing.

Description:

The cartridge consists of a cartridge case of brass or aluminium containing loosely packed smokeless blank powder and a press-fitted percussion primer. A fibre-board wad is inserted over the blank powder and a silicone cover seals the cartridge case at the top.

Functioning:

When the firing pin of the weapon strikes the primer, a flash is generated which ignites the powder charge producing flash, smoke, and a loud report to simulate weapon firing.

Packing: 1 ea. cartridge a carton container,
32 cartridges in a wooden box (58x4x52 cm)
12 boxes (= 384 ctgs.) on a palette
